

Rajat Kumar Jangid

Node JS Developer

Professional Summary

Results-oriented Node.js backend developer with expertise in Node.js, MongoDB, and RESTful APIs. Collaborative team player experienced in delivering efficient and reliable backend solutions. Proven ability to optimize code and server configurations to ensure exceptional performance and scalability. Strong problem-solving skills and a keen eye for detail, committed to delivering high-quality applications.

Projects

Mudra Currency Converter

[Live Demo Link](#)

[Github Repo Link](#)

JavaScript

HTML5

CSS3

- Developed an online currency converter application enabling users to convert amounts between different currencies using *JavaScript*, *HTML5*, and *CSS3*.
- Implemented a secure Login/Register system and a payments page that facilitates currency conversion for transactions.
- Designed and integrated a home page displaying live currency exchange rates.
- Solely responsible for creating the Currency Converter functionality and crafting the Home page.
- Collaborated in a team of 4 members to complete the project within a tight 5-day timeframe.

Experience

Tata Consultancy Services Ltd.

Assistant System Engineer Trainee

August 2021 - October 2022

- Managed diverse servers including WebSphere, Azure, and IIS, ensuring optimal functionality through tasks such as certificate renewal and routine checks on server logs and utilization.
- Spearheaded the efficient handling of new tickets, demonstrating strong organizational skills and the ability to prioritize tasks effectively in a fast-paced environment.
- Fostered seamless communication with vendors and server owners to address specific requirements, establishing collaborative relationships and facilitating smooth workflow.
